

CHANGE THE WORLD PROJECT

Right now, our world is in a dark place. We are in the middle of a global pandemic, a possible economic crisis and one of the biggest social divisions in history. People are angry, sad, scared and fed up. The media is giving some sides of the story and some influencers are desperately continuing to try to show the good that is being done as well. Our leaders are being questioned, our cities torn apart, accusations are being thrown around and no one has the answer on how to fix it.

That's where you come in. **You** are our world's future and after getting to know and teach you this year, I am relieved you are! You are bright, amazing and teach me something new every time I see you.

So I leave the big questions to you:

1. How do you see the world right now? Is our current situation reminiscent of any other time in history?
2. How do you WANT to see the world. What do you want the future to look like?
3. How can we get there? How can we get from your answer in question 1 to your answer in question 2? What does everyone have to do? Leaders, families, children, etc.

I want you to produce something, anything that answers these themes. The creativity is up to you!

Here are some options: Again these are options! You can do anything! I can't wait to see what you come up with!

VIDEOS: Make a Tik Tok, documentary, Skit, podcast episode, news broadcast, speech etc	ART: Mural, painting, sketch, comic strip, political cartoon, infographic,	MUSIC: Write and song and perform it. Perform a song that has you relate to the themes and explain why you chose it. Put together a unified performance on webex or imovie!	WRITING: Write a poem, journal entry, children's book, op-ed article, newspaper article, write a speech for the leaders, a UN address, a letter to the future generation.
